

Contraindications for Permanent Makeup

If you have any of the following permanent make up is not for you. We deeply care about your health, results and desired aesthetic. We will not work with anyone currently experiencing any of the following:

- Under the age of 18
- Pregnant or nursing
- Sick (cold, flu. etc.,)
- Undergoing chemotherapy
- Viral or other infectious disease
- Take blood thinning medications, have blood clotting issues, bleed easily, hemophiliacs
- Uncontrolled diabetes or high blood pressure
- Skin irritation / conditions at/near treatment site (Eczema, psoriasis, rashes, acne)
- Hypersensitive skin
- Extremely thin skin
- Rosacea or capillaries at or near treatment site
- Autoimmune disorders: Lupus, RA, MS, Celiac disease, diabetes type 1, Vasculitis (varies by client - consultation required. May require physicians clearance)
- Use of steroids that thin or over sensitize the skin (topical steroids thin the skin and may cause it to be too fragile for tattooing. Get clearance from your artist prior to your appointment.)

Microblading has additional considerations and we will NOT perform microblading on:

- Sensitive skin
- Oily skin
- Sun damaged skin
- Inflamed skin or skin with acne in or around procedure site
- Thin skin
- Asymmetrical brows
- Coarse hair
- Major shape changes
